

## MANAGING STATE WITH DEPLOYMENTS

## Managing State with Deployments

### Deployment Configuration Spec

There are two **spec** declarations for the deployment. The first will modify the ReplicaSet created, while the second will pass along the Pod configuration.

**spec:****progressDeadlineSeconds: 600****replicas: 1****revisionHistoryLimit: 10****selector:****matchLabels:****app: dev-web****strategy:****rollingUpdate:****maxSurge: 25%****maxUnavailable: 25%****type: RollingUpdate**

*Click on the cards below to learn more details about the elements present in our example.*
