Helm

Chart Contents

A **chart** is an archived set of Kubernetes resource manifests that make up a distributed application. You can learn more from the Helm 3 documentation. Others exist and can be easily created, for example by a vendor providing software. Charts are similar to the use of independent YUM repositories.

```
├── Chart.yaml
├── README.md
├── templates
│   ├── NOTES.txt
│   ├── _helpers.tpl
│   ├── configmap.yaml
│   ├── deployment.yaml
│   ├── pvc.yaml
│   ├── secrets.yaml
│   └── svc.yaml
└── values.yaml
```

Click on the cards to learn more about chart components.
