INGRESS

Ingress

Multiple Rules

On the previous page, we defined a single rule. If you have multiple services, you can define multiple rules in the same Ingress, each rule forwarding traffic to a specific service.

```
- host: ghost.192.168.99.100.nip.io
  http:
    paths:
    - backend:
        service
          name: external
          port:
            number: 80
....
  - host: nginx.192.168.99.100.nip.io
    http:
      paths:
      - backend:
          service
            name: internal
            port:
              number: 8080
....
```
